

Brianna Singer

Technical Product Manager, Data & AI Platforms

916 224 9144 • bsinger3@gmail.com • Newark, New Jersey 07105

Professional Experience

Technical Project Manager, *FriendsWithMeasurements.com*, Newark, New Jersey Aug 2025 – Present

- Rebuilt FriendsWithMeasurements.com to solve a common apparel discovery problem: shoppers struggling to find clothing that fits their body measurements. Redesigned the Postgres data model to support a catalog of 15K+ measurement profiles.
- Built data ingestion and normalization pipelines for apparel datasets, standardizing inconsistent sizing formats and enabling structured filtering.
- Implemented measurement-based product search using Postgres functions, vector similarity queries, and indexed text search, increasing relevant results by more than 30% and reducing “no results” searches by over 80%.
- Designed image and metadata pipelines using Supabase storage and computer vision tagging to improve catalog discoverability and enable measurement-based analytics.

Product Manager, *ALTR*, Melbourne, Florida Feb 2025 – Aug 2025

- Defined product requirements for ALTR’s data governance platform by analyzing customer security workflows and sales feedback, aligning engineering delivery with enterprise data protection needs.
- Transformed competitor sentiment research into a strategic roadmap that prioritized high-demand data governance features, directly supporting the sales pipeline for enterprise accounts.
- Spearheaded ALTR’s Snowflake Native App that uses Snowflake’s native classifiers to scan 50+ TBs of a key customer’s data, detect unprotected sensitive data, apply the right tags, and generate security policy recommendations based on exposure and usage. First customer identified 80+ columns of unprotected PII, cutting manual tagging time by 10s of hours. Product usage tracked through Mixpanel analytics.
- Developed logic across multiple Snowflake audit log types to support automated alerting when security policies are violated and designed remediation flows that revoke permissions and force logouts for suspicious users.
- Partnered with enterprise data security teams to evaluate classifier performance, prioritize roadmap features, and translate governance requirements into deployable product releases.

Product Manager, *Guy Carpenter*, New York, New York Nov 2023 – Dec 2024

- Drove delivery of NLP-powered contract intelligence workflows across more than 100k property reinsurance contracts, reducing average contract review time from 7 days to approximately 10 minutes and capturing more than \$40M in previously unstructured deal economics.
- Built Power BI dashboards that surfaced trends in exception patterns, deal size correlations, and recurring review bottlenecks, equipping brokerage leadership with data to support multimillion dollar negotiations.
- Designed QA experiments and data augmentation techniques that improved model precision by 15% and recall by 9% for high-value edge cases.
- Led scrum ceremonies and tracked OKRs for a five engineer team developing contract extraction and classification models.
- Implemented LLM driven document processing workflows to automate term extraction and reduce manual contract review effort.

Technical Project Manager, *Sirion*, New York, New York May 2022 – June 2023

- Managed budgets exceeding \$75k, led daily scrum and Agile delivery of ML models, consistently hitting +95% of sprint goals for bank clients.
- Served as primary liaison for customers of Sirion’s SaaS product, facilitating document extraction for financial contracts.
- Defined training data requirements and implemented NLP strategies to improve the model’s interpretation of financial tables and charts.
- Mentored junior project managers and led seminars on project scoping, product releases, and management skills.

Social Impact and Volunteer Experience

Domestic Violence Hotline Volunteer, *Sakhi*, New York, New York Jan 2022 – Present

- Provide crisis support for the domestic violence hotline, coordinated with New York City’s Homeless Shelter network for emergency placements.
- Completed training in trauma response and crisis communication to support domestic violence hotline callers effectively.

Suicide Hotline Volunteer, *The Samaritans of New York*, New York, New York Feb 2021 – Sep 2021

- Practiced crisis management, mental health counseling, and emergency response, serving on the suicide hotline for regular volunteer shifts.

Education

Cornell University School of Industrial and Labor Relations, Ithaca, New York May 2018

Bachelor of Science in Industrial and Labor Relations, Minor Degree in Financial Business
Additional coursework in web development, Python scripting, and mobile app development

Awards

1st Place Winner, *Columbia University’s Women in Tech Hackathon*, New York, New York Oct 2022

- Prototyped “HumaneHousing,” a platform that helps recently incarcerated individuals apply for housing in New York State, winning a \$1500 grant.

Honorable Mention, *The Fringe Playwriting Festival*, New York, New York June 2017

- Press release in the East End Beacon for writing and producing a dystopian short play inspired by Franz Kafka.

Skills

- *Data & Analytics:* SQL, MySQL, Snowflake, Power BI, Mixpanel, Excel, Google Sheets
- *Programming & Automation:* Python (Selenium, BeautifulSoup, PyTorch), Google Apps Script
- *Product & Project Management:* Product Roadmapping, Agile Development, Scrum Management, OKRs, Jira (Atlassian Suite), Agile Ceremonies
- *Design & Prototyping:* Figma, UI/UX Design, Human-Centered Design Research, AI-assisted web prototyping (Claude, ChatGPT)
- *Databases & Systems:* Document Databases, Data Modeling, Data Pipelines
- *Communication & Documentation:* Product Specifications, Copywriting, PowerPoint, Google Slides
