---

## SUMMARY

Technical Program Manager with hands-on experience turning enterprise data-security, access governance, and policy-automation needs into shipped product requirements. At ALTR, partnered across product, engineering, sales, and customer security teams to define Snowflake governance workflows for sensitive-data discovery, classification, masking context, audit visibility, and remediation.

---

## TECHNICAL SKILLS

**Languages:** Python, SQL

**Security & Governance:** Access Management, RBAC, Okta Integration, Audit Logging, Data Classification, Data Masking, Policy Automation, Sensitive Data Discovery

**Data Platforms:** Snowflake, Postgres, Supabase, Power BI, Mixpanel

**Program Tools:** Agile, Scrum, OKRs, Roadmap Planning, Requirements Definition, Risk Tracking, Stakeholder Management

---

## EXPERIENCE

**Technical Program Manager**, *FriendsWithMeasurements.com*, Newark, New Jersey Aug 2025 - Present

- Rebuilt FriendsWithMeasurements.com to solve a common apparel discovery problem: shoppers struggling to find clothing that fits their body measurements. Redesigned the Postgres data model to support a catalog of 15K+ measurement profiles.
- Implemented measurement-based product search using Postgres functions, vector similarity queries, and indexed text search, increasing relevant results by more than 30% and reducing no-results searches by over 80%.

**Product Manager**, *ALTR*, Melbourne, Florida Feb 2025 - Aug 2025

- Synthesized enterprise access-control discovery into requirements for group-based RBAC, Okta integration, auditable database access, and a lighter architecture for 600+ databases that avoided 800-900 proxy components.
- Scoped a Snowflake Native App experience that used native classifiers to scan 50+ TB of customer data, surface 80+ columns of unprotected PII, apply tags, and cut manual tagging time by 10s of hours.
- Defined product logic for audit-log threat detection, connecting policy violations, anomalous access patterns, alerting, and remediation actions into an actionable security workflow.
- Developed requirements for automated remediation flows that could respond to suspicious database access by revoking permissions, forcing logout, or escalating alerts for security review.
- Prioritized data-security roadmap opportunities by comparing competitor weaknesses against ALTR strengths in Snowflake governance, masking, tokenization, audit logging, and policy automation.

**Product Manager**, *Guy Carpenter*, New York, New York Nov 2023 - Dec 2024

- Drove NLP contract-intelligence workflows across 100k+ reinsurance contracts, reducing review time from 7 days to about 10 minutes and surfacing \$40M in reusable deal intelligence.
- Built product narratives showing how AI contract intelligence could reduce review cycles from 7 days to about 10 minutes, surface \$40M in hidden deal economics, and make knowledge from 100k+ contracts reusable across teams.
- Built Power BI dashboards that surfaced trends in exception patterns, deal size correlations, and recurring review bottlenecks, equipping brokerage leadership with data to support multimillion dollar negotiations.

**Technical Project Manager**, *Sirion*, New York, New York May 2022 - June 2023

- Managed project plans, budgets exceeding \$75K, delivery risks, and stakeholder updates for financial-contract AI/ML deployments, keeping client workstreams aligned across scope, timeline, and release priorities.
- Led daily Scrum ceremonies, sprint planning, backlog grooming, and delivery tracking for ML model implementation projects serving bank clients, consistently achieving 95%+ sprint goal completion.
- Managed budgets exceeding \$75k, led daily scrum and Agile delivery of ML models, consistently hitting +95% of sprint goals for bank clients.

**Domestic Violence Hotline Volunteer**, *Sakhi*, New York, New York Jan 2022 - Present

- Completed training in trauma response and crisis communication to support domestic violence hotline callers effectively.

**Suicide Hotline Volunteer**, *The Samaritans of New York*, New York, New York Feb 2021 - Sep 2021

- Practiced crisis management, mental health counseling, and emergency response, serving on the suicide hotline for regular volunteer shifts.

---

## PROJECTS

**HumaneHousing - Platform for Housing Applications**

*First Place Winner, Columbia University Women in Tech Hackathon | New York, New York | Oct 2022*

- Co-created HumaneHousing, a prototype platform that helped recently incarcerated individuals apply for housing resources across New York State, winning first place at the Columbia University Women in Tech Hackathon and securing a \$1,500 grant.
