SUMMARY

Product Manager with experience supporting digital products, internal tools, AI/ML workflows, analytics dashboards, and backend data services from discovery through launch readiness. Skilled at translating business needs into user stories, acceptance criteria, roadmap priorities, documentation, KPIs, and release plans. Strong cross-functional collaborator across engineering, design, analytics, operations, security, and business stakeholders, with hands-on technical fluency in SQL, Python, Snowflake, Postgres, Power BI, and product analytics.

TECHNICAL SKILLS

Languages: SQL, Python

Data & Platforms: Snowflake, Postgres, Supabase, Power BI, Mixpanel

Product Management: Roadmap execution, backlog grooming, user stories, acceptance criteria, requirements documentation, KPIs, launch readiness

Delivery: Agile, Scrum, SDLC, sprint planning, stakeholder management, risk tracking, dependency management, cross-functional communication

EXPERIENCE

Technical Product Manager, *FriendsWithMeasurements.com*, Newark, New Jersey Aug 2025 - Present

- Own roadmap execution for a measurement-driven apparel discovery product, translating user fit problems into prioritized requirements, backend data model improvements, and product delivery tasks.
- Rebuilt the Postgres data model to support a catalog of 15K+ measurement profiles, improving the foundation for product matching, analytics, and customer-facing recommendations.
- Scaled ingestion and transformation workflows across high-volume catalog and review sources, including a Hollister pipeline that processed 1,966 products and 160K+ customer reviews.
- Analyze structured product and customer feedback data to identify iteration opportunities, improve data quality, and guide prioritization across product coverage and user experience.

Product Manager, *ALTR*, Melbourne, Florida Feb 2025 - Aug 2025

- Supported product delivery for a Snowflake Native App that used Snowflake classifiers to scan 50+ TB of customer data, detect unprotected sensitive data, apply tags, and recommend security policies.
- Translated enterprise security and governance requirements into structured product requirements, user stories, acceptance criteria, and release priorities for engineering delivery.
- Partnered with engineering, sales, security, and customer stakeholders to refine backlog priorities, clarify dependencies, and align feature delivery with enterprise data-protection needs.
- First customer identified 80+ columns of unprotected PII and reduced manual tagging effort by tens of hours through automated classification and policy recommendation workflows.
- Used Mixpanel analytics and customer feedback to assess feature adoption, communicate product progress, and identify opportunities for roadmap iteration.

Product Manager, *Guy Carpenter*, New York, New York Nov 2023 - Dec 2024

- Drove delivery of NLP-powered contract intelligence workflows across 100K+ property reinsurance contracts, reducing average review time from 7 days to approximately 10 minutes.
- Drafted requirements, success metrics, and stakeholder-ready documentation for analytics workflows that surfaced \$40M+ in previously unstructured deal economics.
- Partnered with technical, analytics, operations, and business teams to support feature development, testing, validation, launch readiness, and stakeholder alignment.
- Built Power BI dashboards that exposed exception patterns, deal-size correlations, recurring review bottlenecks, and negotiation risks for multimillion-dollar brokerage decisions.
- Designed QA experiments and validation reviews that improved model precision by 15% and recall by 9% for high-value edge cases.

Technical Project Manager, *Sirion*, New York, New York May 2022 - June 2023

- Managed financial-contract AI/ML implementations for banking clients, coordinating multiple concurrent workstreams across scope, budget, delivery risks, release milestones, and stakeholder updates.
- Led Scrum ceremonies, sprint planning, backlog grooming, and delivery tracking for ML model implementation projects, consistently achieving 95%+ sprint goal completion.
- Defined acceptance criteria and release priorities with technical and business teams, validating model and workflow outputs against client requirements before production delivery.

EDUCATION

Cornell University School of Industrial and Labor Relations | Bachelor of Science, Industrial and Labor Relations
