

Brianna Singer

Project Manager / Scrum Master - Financial Systems

bsinger3@gmail.com | 916 224 9144 | <https://github.com/bsinger3/> | <https://linkedin.com/in/briannasinger/>

SUMMARY

Project Manager and Scrum Master with 4 years of experience delivering financial-contract, AI/ML, analytics, and governance initiatives across regulated and enterprise environments. Experienced in Agile ceremonies, backlog refinement, user stories, acceptance criteria, risk tracking, stakeholder reporting, budget management, and cross-functional delivery with product, engineering, client, and business teams.

TECHNICAL SKILLS

Delivery & Governance: Agile, Scrum, Kanban, SDLC, release planning, change management, risk tracking, dependency management, UAT, acceptance criteria

Financial Systems: financial contracts, reinsurance contracts, contract intelligence, document extraction, financial tables, brokerage analytics, reporting workflows

Tools & Analytics: Jira, Confluence, Power BI, Mixpanel, Python, SQL, Snowflake, Postgres, Supabase

Product & Program: roadmaps, project plans, executive dashboards, status reporting, stakeholder management, requirements definition, backlog prioritization

EXPERIENCE

Technical Program Manager, *FriendsWithMeasurements.com*, Newark, New Jersey Aug 2025 - Present

- Rebuilt FriendsWithMeasurements.com to solve a common apparel discovery problem: shoppers struggling to find clothing that fits their body measurements. Redesigned the Postgres data model to support a catalog of 15K+ measurement profiles.
- Scaled catalog and review data coverage across high-volume sources, including a Hollister pipeline that processed 1,966 products and 160K+ customer reviews into structured fit and measurement data for downstream analytics.

Product Manager, *ALTR*, Melbourne, Florida Feb 2025 - Aug 2025

- Spearheaded ALTR's Snowflake Native App that uses Snowflake's native classifiers to scan 50+ TBs of a key customer's data, detect unprotected sensitive data, apply the right tags, and generate security policy recommendations based on exposure and usage. First customer identified 80+ columns of unprotected PII, cutting manual tagging time by 10s of hours. Product usage tracked through Mixpanel analytics.
- Defined product logic for audit-log threat detection, connecting policy violations, anomalous access patterns, alerting, and remediation actions into an actionable security workflow.
- Translated audit-log event types into product requirements for compliance-friendly reporting, including who changed policies, which policy decision was applied, and why an action was allowed or blocked.

Product Manager, *Guy Carpenter*, New York, New York Nov 2023 - Dec 2024

- Drove delivery of NLP-powered contract intelligence workflows across more than 100k property reinsurance contracts, reducing average contract review time from 7 days to approximately 10 minutes and capturing more than \$40M in previously unstructured deal economics.
- Built product narratives showing how AI contract intelligence could reduce review cycles from 7 days to about 10 minutes, surface \$40M in hidden deal economics, and make knowledge from 100k+ contracts reusable across teams.
- Built Power BI dashboards that surfaced trends in exception patterns, deal size correlations, and recurring review bottlenecks, equipping brokerage leadership with data to support multimillion dollar negotiations.

Technical Project Manager, *Sirion*, New York, New York May 2022 - June 2023

- Managed project plans, budgets exceeding \$75K, delivery risks, and stakeholder updates for financial-contract AI/ML deployments, keeping client workstreams aligned across scope, timeline, and release priorities.
- Led daily Scrum ceremonies, sprint planning, backlog grooming, and delivery tracking for ML model implementation projects serving bank clients, consistently achieving 95%+ sprint goal completion.
- Translated client document-extraction requirements into Agile delivery plans, breaking financial contract workflows into prioritized user stories, acceptance criteria, and model-training tasks.
- Defined training-data requirements and NLP improvement priorities for financial tables and charts, then tracked delivery through sprint ceremonies, release planning, and client-facing progress updates.

Domestic Violence Hotline Volunteer, *Sakhi*, New York, New York Jan 2022 - Present

- Provide crisis support for the domestic violence hotline, coordinated with New York City's Homeless Shelter network for emergency placements.

Suicide Hotline Volunteer, *The Samaritans of New York*, New York, New York Feb 2021 - Sep 2021

- Practiced crisis management, mental health counseling, and emergency response, serving on the suicide hotline for regular volunteer shifts.

PROJECTS

HumaneHousing - Platform for Housing Applications

First Place Winner, Columbia University Women in Tech Hackathon | New York, New York | Oct 2022

- Co-created HumaneHousing, a prototype platform that helped recently incarcerated individuals apply for housing resources across New York State, winning first place at the Columbia University Women in Tech Hackathon and securing a \$1,500 grant.

EDUCATION

Cornell University School of Industrial and Labor Relations | Bachelor of Science, Industrial and Labor Relations
