

Brianna Singer

Product Manager

bsinger3@gmail.com | 916 224 9144 | <https://github.com/bsinger3/> | <https://linkedin.com/in/briannasinger/>

SUMMARY

Product Manager with 4 years of experience translating business needs into structured requirements, roadmap priorities, and Agile delivery plans for data, AI, and analytics products. Experienced in backlog ownership, stakeholder discovery, KPI analysis, and cross-functional delivery across ML contract intelligence, Snowflake governance, and data-driven consumer search platforms.

TECHNICAL SKILLS

Languages: Python, SQL

Data & AI Platforms: Snowflake, Postgres, Supabase, Power BI, Mixpanel, NLP, LLM workflows, data pipelines

Product & Delivery: product roadmap, backlog prioritization, Agile, Scrum, OKRs, PRDs, user stories, acceptance criteria, UAT, stakeholder discovery, risk tracking

Governance & Analytics: data governance, sensitive data discovery, classification workflows, KPI analysis, requirements traceability

EXPERIENCE

Technical Program Manager, *FriendsWithMeasurements.com, Newark, New Jersey Aug 2025 - Present*

- Rebuilt FriendsWithMeasurements.com to solve a common apparel discovery problem: shoppers struggling to find clothing that fits their body measurements. Redesigned the Postgres data model to support a catalog of 15K+ measurement profiles.
- Implemented measurement-based product search using Postgres functions, vector similarity queries, and indexed text search, increasing relevant results by more than 30% and reducing no-results searches by over 80%.
- Scaled catalog and review data coverage across high-volume sources, including a Hollister pipeline that processed 1,966 products and 160K+ customer reviews into structured fit and measurement data for downstream analytics.

Product Manager, *ALTR, Melbourne, Florida Feb 2025 - Aug 2025*

- Spearheaded ALTR's Snowflake Native App that uses Snowflake's native classifiers to scan 50+ TBs of a key customer's data, detect unprotected sensitive data, apply the right tags, and generate security policy recommendations based on exposure and usage. First customer identified 80+ columns of unprotected PII, cutting manual tagging time by 10s of hours. Product usage tracked through Mixpanel analytics.
- Led product discovery for a Snowflake data classification workflow that scanned 50+ TB of customer data, identified 80+ columns of unprotected PII, and translated security needs into automated policy-recommendation requirements.
- Synthesized enterprise access-control discovery into requirements for group-based RBAC, Okta integration, auditable database access, and a lighter architecture for 600+ databases that avoided 800-900 proxy components.
- Partnered with sales and technical stakeholders to turn discovery-session transcripts into product requirements, stakeholder maps, and customer-specific problem statements for enterprise data-access governance.

Product Manager, *Guy Carpenter, New York, New York Nov 2023 - Dec 2024*

- Drove delivery of NLP-powered contract intelligence workflows across more than 100k property reinsurance contracts, reducing average contract review time from 7 days to approximately 10 minutes and capturing more than \$40M in previously unstructured deal economics.
- Built product narratives showing how AI contract intelligence could reduce review cycles from 7 days to about 10 minutes, surface \$40M in hidden deal economics, and make knowledge from 100k+ contracts reusable across teams.
- Built Power BI dashboards that surfaced trends in exception patterns, deal size correlations, and recurring review bottlenecks, equipping brokerage leadership with data to support multimillion dollar negotiations.

Technical Project Manager, *Sirion, New York, New York May 2022 - June 2023*

- Managed project plans, budgets exceeding \$75K, delivery risks, and stakeholder updates for financial-contract AI/ML deployments, keeping client workstreams aligned across scope, timeline, and release priorities.
- Led daily Scrum ceremonies, sprint planning, backlog grooming, and delivery tracking for ML model implementation projects serving bank clients, consistently achieving 95%+ sprint goal completion.
- Translated client document-extraction requirements into Agile delivery plans, breaking financial contract workflows into prioritized user stories, acceptance criteria, and model-training tasks.

Domestic Violence Hotline Volunteer, *Sakhi, New York, New York Jan 2022 - Present*

- Provide crisis support for the domestic violence hotline, coordinated with New York City's Homeless Shelter network for emergency placements.

Suicide Hotline Volunteer, *The Samaritans of New York, New York, New York Feb 2021 - Sep 2021*

- Practiced crisis management, mental health counseling, and emergency response, serving on the suicide hotline for regular volunteer shifts.

PROJECTS

HumaneHousing - Platform for Housing Applications

First Place Winner, Columbia University Women in Tech Hackathon | New York, New York | Oct 2022

- Co-created HumaneHousing, a prototype platform that helped recently incarcerated individuals apply for housing resources across New York State, winning first place at the Columbia University Women in Tech Hackathon and securing a \$1,500 grant.

EDUCATION

Cornell University School of Industrial and Labor Relations | Bachelor of Science, Industrial and Labor Relations
